

# The Ultimate Switch™ from Greer®

Quite simply, the most advanced  
anti two-block switch in the world.

The Ultimate Switch™ from Greer Company is the latest innovation in A2B switches, with added protection against two-blocking situations for crane operators and ground personnel. As crane operations become more challenging, the Ultimate Switch offers advanced features that address the need for a smaller footprint on boom heads, easy cable replacement, no-hassle mounting flexibility, and dramatically less cable wear.

## Smaller Footprint

Fits easily on crowded boom heads (? x ?)

## Universal Mounting Adapter

Enables easy switch replacement when converting from a competitor switch.

## 360° Rotation of the Switch Cable

Eliminates cable "bird nesting."

## Advanced Electrical Interface

Offers a quick disconnect feature for easy cable replacement, making switch removal unnecessary.

## Travel Mode Lockout Pin and Flag

Easily removed for crane operations and reinstalls quickly for rigging and travel operations.

## Quick Connect Clip

Designed for quick main and jib mounting. Spring clip is quickly removed providing easy and rapid installation or replacement.

22°

## 22° Swivel and a 360° Rotation

Keep switch parallel to load line, reducing the potential of switch (cable) damage at high and low boom angles; reduce cable drag from the switch to load line.

360°

**LOCKED OUT**

Call Greer today at 918-298-8300 and discover the advantages  
of the new Ultimate Switch.

The Ultimate Switch™ is part of a complete line of crane warning systems and accessories from Greer®.

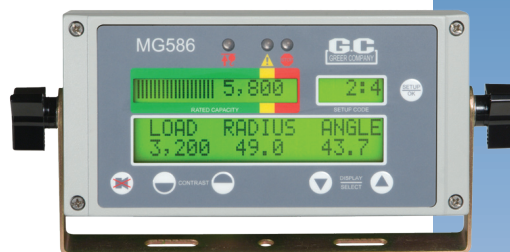

**MicroGuard® Rated Capacity Indicators:**

- Feature FastCal™, our exclusive technology that delivers the industry's fastest calibration time.
- Automatically send rated capacity, actual load, percent of rated capacity, load radius, boom angle, boom length, and crane configuration data to an easy-to-read digital display.
- Offer visual and audible alarms to alert operators of potential overloading.
- Feature Work Area Definition to help operators avoid unseen obstacles, such as power lines.
- Provide continuous display of crane geometry in all lighting conditions, and offer multiple language options, easy-to-understand graphics, and quick set-up.

**Model 510**  
For rough terrain, all-terrain and truck crane applications

**Model 586**  
For industrial carry-deck and truck crane applications

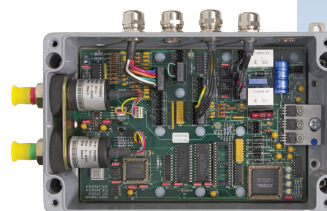

**MicroGuard® System Components Include:**

**Anti-Two Block Switch Kits**

**Reeling Drums with Boom Angle and Length Sensors**

**Computers**
