LOAD MOMENT INDICATOR

MONITORING AND ALERT SYSTEMS

LEADING THE MARKET IN LMI INNOVATION TECHNOLOGY.

Greer, the global industry leader of Load moment indicator monitoring and alert systems. Greer LMI is the easiest interface on the market to use. Intuitive menus and screens reduce operator training time and increase crane productivity. Greer's newest innovation monitors crane operation continuously and provides the vital data crane operators need to maximize operator efficiency. Greer LMI's systems are easily calibrated to your crane's load chart using innovative proprietary technology, ensuring lightning-fast installation and calibration time that's measured in hours, not days. What's more, Greer's LMI is engineered for predictable performance, regardless of weather.

HIGHLIGHTS

- Easiest and most intuitive interface in the market with optional touch screen technology.
- Intuitive menus and screens reduce operator training time and increase crane productivity.
- Multiple display options available in touch screen or push-button technology.
- Fastest calibration in the market leveraging deep industry experience.
- Customizable operator alerts; work area definition, boom height and extension, etc.
- Industry standard monitoring of crane capacity to ensure safe operations.
- Operators can easily customize alerts based on current environmental or job site conditions.

BREADTH OF PRODUCTS FOR LMI

Data Logger & Event Recorder

- Out of the box state regulatory compliant.
- USB accessible for easy data retrieval.

Easy Serviceability

- Lower total cost of ownership (LTCO).
 - Transducers individually replaceable.
- Extended life of equipment.
 - Flexible Cab CPU Placement.

Enhanced Indication Flexibility

- Multiple inputs and out puts for feature enhancements.
- CAN J1939.
